

"Dialogue across national borders" is the objective of the European Forum Water. Take the opportunity to exchange views and experience, especially in view of the growing importance of water supplies in a united Europe. Presentations and discussions will cover the current situation in the water industry from a European and national point of view, for example:

- **EU Drinking Water Directive – latest developments**
- **Results of EU Drinking Water Directive implementation**
- **Introduction of technical standards in southern, central and eastern Europe**
- **Practical implementation of the WHO Water Safety Plan**
